

### REMARKS

In this preliminary amendment, typographical errors in the specification are corrected. At page 4, line 17 and page 14, line 7, the specification is amended to accurately state the weight of a typical film product as approximately 30 milligrams, instead of 0.3 grams as originally filed.

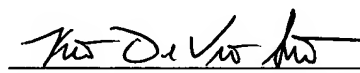

At page 9, line 18, the specification is amended to accurately note that fatty alcohols are generally insoluble. Previously, the specification stated that fatty alcohols are generally soluble due to a typographic mistake.

Applicants respectfully submit that no new matter is added by these amendments. The Examiner is encouraged to contact Applicants' undersigned representative with any questions.

Respectfully submitted,

MERCHANT & GOULD P.C.
